

**Updated DD Waiver Services Taxonomy and Provider Enrollment Detail**

Virginia Department of Medical Assistance Services

Medicaid Enterprise System (MES)

**Summary of Changes:**

- A. Beginning on March 25, 2022, all DMAS Covered Services will require the use of Taxonomy Codes in claims submission. Please remember to include a taxonomy code on ALL claims after 8 p.m. March 25, regardless of the date of service.
- B. Provider Agencies will be enrolled as a specific provider type with a specialty that designates the services for which the provider may receive reimbursement.
- C. The provider type and specialty are based on your agency's provider enrollment application, license and other information. These provider type and specialty codes are not used in the claim form by the provider and do not need to be included in any paper or EHR generated claims.
- D. Based on the service or services delivered by your agency, you will need to select at least one taxonomy code or codes to use with all of your claims submissions.
